6M 2020 profitability affected by spread of COVID-19

The first half of 2020 was marked by extraordinary circumstances for the entire global tourism industry. After a successful start of the year both financially and in terms of sales, in February together with the global tourism business we faced the spread of the COVID-19 virus.

At the end of Q1, we have suspended our operations until the beginning of July. This surely negatively affected our financial results.

Seasonality of Novaturas business with strong shoulder season

Novaturas operates in a sector which is subject to seasonality. It is characterized by higher demand for the Group's products and services during the summer season, i.e. in the second and third quarters of the year, and lower demand in the remaining periods.

In case of Novaturas the high season is very long (May to October). We also have a strong shoulder season, therefore our monthly and quarterly revenues distribution is better balanced throughout the year.

Macroeconomic conditions in the Baltics

GDP growth rate (%)

Unemployment rate (%)

Average monthly gross salary (EUR)

Inflation (%)

The hike in the average gross salary in Lithuania, visible between Q4 2018 and Q1 2019, is the result of new tax regulations that took effect with the beginning of 2019 and introduced a new accounting method that mainly affected gross salaries, while having negligible effect on net salaries. Under the new system, the due social security contributions are counted as part of the gross salary, increasing it significantly.
